The RCE Request and IDS received 12/18/03 have been entered and claims 40-47 are currently pending in this application.

It would appear the point of novelty of the presently claimed invention lies in the monitoring of the monolayer specimen for production of soluble secreted factors indicative of a disease state. None of the cited references teach or fairly suggest this feature.

Gerweck (Radiology) teaches other presently claimed features of preparing a biopsy sample but does not teach monitoring a monolayer specimen for production of soluble secreted factors indicative of a disease state.
